The Wave of Life

Alfred Phillips Jr.

aka

Alfred Phillips Jr. aka San Akhnaton Yao Assegai A-SK

Key definitions and terms used in this section

abbr – abbreviation (Abbreviations here are still words, not always pronounced easily, of few letters use to designate the defined idea.)
acrm – (abbr) acronym (Acronyms here are still words, not always pronounced easily, formed by taking the first letter(s) in a series of words.)

AncSum – All of one's ancestors for the last six million years, that is, when our lineage split off from that of bonobos, gorillas, *etcetera*

Azain – The postulated spirit and dynamics of the Summ. It deals with the behavior (motions) as well as the “whys” of things. Its mathematical projection is related to the laws of physics, nature, and science

cka – acrm of commonly known as

DNA – (abbr: deoxyribonucleic acid) a long flexible ladder-like structure consisting of rungs of many component pairs from four chemicals (nucleotides) having symbols A and T, or G and C. This ladder-like structure can be split down the center so that two identical structures can form; it is the genetic material of all living things, animals, plants, bacteria, viruses, *etcetera*; when neatly twisted, the flexible ladder-like structure can be thought of as a double helix

Equitocracy – the dynamic system resulting from the extension of one person one vote concept to an equal share of the wealth of the earth to all human beings, while maintaining a sustainable Eth, after reparations resulting from WPHN crimes are paid

Eth – Earth; also the first three letters of Ethiopia a place where *Homo sapiens* lived at least 165,000 years ago

Great-Global Source-Ken Family – (abbr. GGSKF)-All of the human family. All of our ancestors started in Source-Eth (SE) about 200,000 years ago and migrated from SE 50,000 to 100,000 years ago. In mid 2011 CE, there were about seven billion people

Invariant Ethics – human defined principles aligned with *Equitocracy* applicable to all sentient creatures for the lifetime of each species

MLK – Our acrm of Martin Luther King, Jr. We also define it as the number 100 billion (10^{11} in scientific notation). There are approximately one MLK neurons in the human brain, approximately one MLK of stars in the typical galaxy, and one MLK of galaxies in the Summ (*aka* Universe(s)). It is nice for such a significant number to be associated with such a significant man

ProgSum – The sum of all of an individual's progeny for as long as humans exists

sc – acrm of so-called

SK – acrm of Source-Ken

SKousins – The primate precursors of Source-Ken all of which originate in Source-Eth as far back as 6 million years ago. The so-called Neanderthals, again who originated in Source-Eth, are the First SKousins of Source-Ken. These primates like Source-Ken migrated all over the Eth including Peking and Java. We have SKousins going back to our Seventh SKousins

Source-Eth – (acrm: SE) Africa; the source/creation place for all of the SKousins (hominids) over the last approximately six million years, and the creation place for *Homo sapiens* over the last approximately 200,000 years

Source-Ken – Africans; the source/creation people; the parent people, and the original people of the GGSKF, the mainfamily

Summ – All that the Source brings into existence. The totality of all of the universes. The sum of all that can manifest materially and in all other manners. The Summ is more than the cosmos. The Summ is not the Source. The Source is the parent of the Summ. The Summ has as a component the totality of energy-mass

WPHN – acrm for “In the wake of Prince Henry the non-navigator, meaning starting around 1420 CE.” This marks the onset of European attacks on Source-Ken

Life on Eth started some 4 billion (4 percent of an MLK) years ago. It projected out onto the sea of possibilities. It took on the many forms that have existed on Eth. It manifested itself into the life-forms that have shown up and, in most cases, vanished from the Eth. Ripples of forms of life interacted with Azain (the postulated spirit and demonstrated dynamics of the Summ), particularly in the Source-Eth environment. Over the long course of time, more complex life-forms were propagated.

Some 6 million years ago, our SKousins (human precursors) were evident. Human life on Eth was created in Source-Eth over the millennia by the interaction of our SKousins (hominids) and Azain. The origination of *Homo sapiens* also happened in Source-Eth. The true enpeoplement or

Alfred Phillips Jr. aka San Akhnaton Yao Assegai A-SK

colonization of the world was a Source-Ken (African) activity. We can imagine human life as an expanding wave. Prior life-forms, all DNA based, had some awareness, that is, the consciousness of life. This process manifests not only as the tidal wave—human life on Eth—but as the swells and calms of all sentient beings existent and extinct.

As individual humans, part of the Wave of Life, we move in our lives like the particles in a water wave. We move in our domain during our lifetime, then the Wave of Life moves on. The behavior of one part of the wave in one region of water influences the behavior in many other parts of the water at a later time.

We can do much to discover our ancestral lineage back to the creation of life on Eth. We want to understand ourselves, Azain, and the Summ (totality of all). We must do as much as we can to determine the nature of the *Source*, what existed before the *Tanz* (*cka* the Big Bang), and caused the Wave of Life. If necessary, we will expand the paradigm of science to accomplish this. Yet, we may be able to know the *Source* only as related to causality, that is, it may be impossible to understand it fully. We will study and find out what we find out.

The Wave of Human Life manifests now as the Great Global Source-Ken Family (GGSKF) all human life on Eth, with numbers now approaching several percent of an MLK. Many people and many subfamilies have been unjustly abused, particularly WPHN. The SK mainfamily of SE and the BK subfamilies of the BH were particularly terrorized and abused. The livability of many species of life on Eth was concurrently abused. This must be rectified. Reconstruction of the Wave of Human Life for the people who have suffered unjustly is accomplished secondarily by reparations to their subfamilies. It is accomplished primarily by people of these subfamilies making justice real now using mostly the nonviolent ways that Martin Luther King, Jr. demonstrated. In these ways we simultaneously heal the livability of the Eth for all sentient beings. These accomplishments are done by individuals, functioning in organizations, living their lives in positively-directed, thoughtful, enjoyable, active, loving manners, and all the while creating *Equitocracy*. We formulate *Invariant Ethics* for all sentient beings on Eth. We get our lives, as the GGSKF, back on track. We master brain science, the science of DNA, and the science of the Summ. We thereby clarify spirituality: *Aaahyour*—that known to an individual, *Aaahyalls*—that which a group contends to know, and *Aaahifa*—that which, in principle, we all can know and demonstrate. We nullify the effect on us of negativity brought to the lives of our ancestors (AncSum). We do this for the sake of our memory of the ancestors. We do this for our own sake. We do this for the sake of those who will come after us (ProgSum). We believe that we can abolish prior negative effects by continual strong, present action. We redirect the Wave of Life, putting it back on its natural track before the negative advent WPHN.
